

HDMI Amplifier Equalizer

ID# 438

Operation Manual

Introduction

Using a standard HDMI cable to transmit high definition audio/video at a long distance will result in digital degradation. Our HDMI Amplifier Equalizer can correct digital error and provide 8 dB input equalization to compensate for cable transmission loss, it will eliminate digital noise (sparkles) to ensure you to receive perfect HDTV picture after long cable transmission.

Features

- * Provides 8 dB input equalization to compensate for long HDMI cable loss.
- * Extend cable reach to 40 meters- 20 meters from the source to the equalizer plus 20 meters from the equalizer to the projector, TV/monitor.
- * Maintains high HDMI single link video resolution up to UXGA/1080p.
- * HDCP compliant.
- * Plug and play, easy to install.
- * Can be powered directly from the cable.
However it is recommended to use external power adaptor for long cable application.
- * HDMI is backward compatible with DVI,
The unit will work with either DVI or HDMI.
